Summary

Software Developer | Problem Solver | Innovator

Experienced software developer skilled in JavaScript, TypeScript, React, Next.js, Node.js, Firebase, Java, OOP, and MongoDB. Passionate about building clean, scalable, and high-performance digital solutions. Strong background in frontend and backend development, optimizing machine learning scripts, and enhancing data quality. Expertise in crafting efficient, user-friendly applications that drive impact. Always eager to learn, collaborate, and innovate in dynamic environments.

Work Experience

Freelance

2022 - Present

Freelancer

Lusaka

- Designed and developed custom software solutions tailored to client specifications using various programming languages and frameworks, ensuring high-quality, scalable, and maintainable code.
- Performed rigorous testing and debugging to guarantee functionality and eliminate errors, delivering software that meets client expectations.
- Managed project timelines and resources efficiently, ensuring projects were delivered on time and within budget.
- Provided ongoing technical support to clients, ensuring continued software performance and client satisfaction over time.
- Stayed updated on industry trends, incorporating emerging technologies into projects for cutting-edge software solutions.

Impact Enterprises

Jun 2023 - Present

JavaScript Developer - Annotations

Remote

- Annotated JavaScript scripts for Machine Learning software, accurately analyzing and labeling data to improve the effectiveness of machine learning models.
- Collaborated with development teams to enhance the accuracy of training data, ensuring high-quality and precise annotations that directly contribute to model performance improvements.
- Participated in hybrid work environments, collaborating remotely and on-site in Lusaka, Zambia, to support data-driven machine learning projects effectively.
-

Skills

- **Programming Languages:** JavaScript, Java, Next.js, React, MySQL, NoSQL, Git
- **Frameworks & Tools:** Spring Boot, React, Node.js, Tailwind CSS, Next.js, Database, Java, Firebase, MongoDB
- **Version Control:** Git
- **CRM Platforms:** Experienced in integrating workflows, Automation
- **Data Analysis:** Proficient in business research, data validation, lead qualification, machine learning annotations

Education

The Copperbelt University

Jan 2022 - Jan 2022

Bachelor of Science, Biology, Bioinformatics
